What I found interesting was that all the EV components were off the shelf parts, including the self-branded DC motor from NetGain, Netgain controller, Elcon Charger. They use Flux batteries which are Chinese LifePo cells with custom BMS. I liked their choice of transaxle which looked like a miniature version of what you can find in an old 70's VW Bug. They told me it is made by BMW.

What color would you choose for the Tesla S?
